

Contents to Volume 37

No. 1,2

Issue contents	1
Young MOD Investigator Award	2
S. Becker, J. Casanova and L. Gabel Localization of endoderm-specific mRNAs in differentiating F9 embryoid bodies	3
M. Maden, C. Horton, A. Graham, L. Leonard, J. Pizze, G. Siegenthaler, A. Lumsden and U. Eriksson Domains of cellular retinoic acid-binding protein I (CRABP I) expression in the hindbrain and neural crest of the mouse embryo	13
H. Sasaki, M. Yamamoto and A. Kuroiwa Cell type dependent transcription regulation by chick homeodomain proteins	25
M. Mlodzik, Y. Hiromi, C.S. Goodman and G.M. Rubin The presumptive R7 cell of the developing <i>Drosophila</i> eye receives positional information independent of <i>sevenless</i> , <i>boss</i> and <i>sina</i>	37
L.A. Abbott and J.E. Natzle Epithelial polarity and cell separation in the neoplastic k(1)dlg-1 mutant of <i>Drosophila</i>	43
T. Bouwmeester, S. Güemann, T. El-Baradi, F. Kalkbrenner, I. Van Wijk, K. Moelling and T. Pieler Molecular cloning, expression and in vitro functional characterization of Myb-related proteins in <i>Xenopus</i>	57
O. Ait-Ahmed, B. Bellon, M. Capri, C. Joblet and M. Thomas-Delaage The <i>yemanuclein-α</i> : a new <i>Drosophila</i> DNA binding protein specific for the oocyte nucleus	69
E. Thüroff, S. Stöven and H. Kress <i>Drosophila</i> salivary glands exhibit a regional reprogramming of gene expression during the third larval instar	81
J. Piette, M. Huchet, A. Duclert, A. Fujisawa-Sehara and J.-P. Changeux Localization of mRNAs coding for CMD1. Myogenin and the α -subunit of the acetylcholine receptor during skeletal muscle development in the chicken	95
Announcement	107

No. 3

Issue contents	109
Young MOD Investigator Award	110
N.A. Wall, C.M. Jones, B.L.M. Hogan and C.V.E. Wright Expression and modification of Hox 2.1 protein in mouse embryos	111
J.L. Crosby, D.S. Varnum, L.L. Washburn and J.H. Nadeau Disorganization is a completely dominant gain-of-function mouse mutation causing sporadic developmental defects	121
D. Hodges and S.I. Bernstein Suboptimal 5' and 3' splice sites regulate alternative splicing of <i>Drosophila melanogaster</i> myosin heavy chain transcripts in vitro	127
R.P. Harvey MyoD protein expression in <i>Xenopus</i> embryos closely follows a mesoderm induction-dependent amplification of <i>MyoD</i> transcription and is synchronous across the future somite axis	141
R.L. Peterson, D.F. Jacobs and A. Awgulewitsch Hox-3.6: isolation and characterization of a new murine homeobox gene located in the 5' region of the Hox-3 cluster	151
L.N. Ruben, M.A. Scheinman, R.O. Johnson, S. Shiigi, R.H. Clothier and M. Balls Impaired T cell functions during amphibian metamorphosis: IL-2 receptor expression and endogenous ligand production	167
M.A. Harkey, H.R. Whiteley and A.H. Whiteley Differential expression of the msp130 gene among skeletal lineage cells in the sea urchin embryo: a three dimensional in situ hybridization analysis	173
Corrigendum	185
Announcements	187
